Social and Developmental Canvas of India

Why a "Working Conference"? - Purpose & Theme

Welcome to a conference with a difference!

Breaking away from the format of outlined agenda, specified topics, and fixed speakers, the [2nd National Conference on Social Entrepreneurship](#) is designed to collaboratively explore, discuss, learn from each other, and co-create...

Designed as interest-based 'facilitated' Working Groups, the conference aims to:

- *facilitate learning by actively involving the participants in collaboratively solving real, live problems, which are of their interest and concern.*
- *leverage the rich experience and competence available in the participants' community to address real challenges, issues and opportunities facing the sector, and help learning from each other.*
- *result in relevant "take-home" learning (solutions and alternatives) for the participants, which can be implemented.*

The Themes & Design

The Conference is designed around seven broad themes for the Working Groups; each group would be anchored by Social Entrepreneurs/ Resource Persons, who have contributed significantly to that particular space, and will add value to the discussions and outcomes:

- [Market Linkages](#): Mainstreaming the Marginalised Producers
- [Employment & Livelihood](#): Organising the Unorganised

Confirmed Resource Persons:

Mr Arbind Singh
